

## Task

1. Get the HTML / Javascript template code from <http://play.appendto.com/hdc-01/edit>
2. Create a button
3. Create a click event handler for the button
4. Inside the event handler, iterate over the li elements in the DOM, change the text color of each LI element to Blue

## Goal

1. Know how to attach event handlers to DOM elements
2. Understand explicit and implicit iteration

## Reference

1. <http://play.appendto.com/hdc-01/edit>

## Advanced

1. Change the color of each li element to blue without iterating over each
2. Alter every other li element, with and without using iteration
