Task

1. Get the HTML / Javascript template code from http://play.appendto.com/hdc-04/edit

2. Bind a click event to each button which animates each DIV in a different manner

Goal

1. To give an opportunity to make use of the jQuery effects and animation

2. To work with interaction that comprises multiple elements.

Reference

3. http://play.appendto.com/hdc-04/edit

Advanced

1. Using the animate() function, create an effect that slides an element up to display, and down to hide. The built in slideUp() and slideDown() methods have the opposite functionality.
